Trichy, Tamil Nadu, India

PROFESSIONAL SUMMARY

Results-driven Cybersecurity Professional with hands-on experience in penetration testing, vulnerability assessment, and red teaming. Skilled in identifying OWASP Top 10 and API security vulnerabilities using Burp Suite, Metasploit, and Nmap. Proficient in Python scripting for security automation, threat analysis, and detailed vulnerability reporting. ISC2 CC exam-ready with strong understanding of enterprise security environments.

TECHNICAL SKILLS

Security Testing: Penetration Testing, Vulnerability Assessment, Web Application Security, Network Security, Ethical Hacking, Red Teaming, Social Engineering

Tools & Frameworks: Burp Suite Professional, Metasploit, Nmap, Nessus, OWASP ZAP, Wireshark, SQLMap, XSSStrike, Netcraft, Sublistar,

Security Domains: OWASP Top 10, OWASP, Intrusion Detection Systems (IDS), SIEM, Incident Response, Threat Intelligence, Risk Assessment,

Programming & Scripting: Python, Bash/ SQL

Operating Systems: Kali Linux, Windows, Unix/Linux, VirtualBox, VMware

Methodologies: PTES, OSSTMM, NIST Cybersecurity Framework, CTF Challenges (Hack The Box, VulnHub)

Additional Skills: OSINT, Technical Report Writing, Security Documentation

PROFESSIONAL EXPERIENCE

Cybersecurity Intern

January 2025 -Feb 25

E-soft IT Solution – Trichy

Trichy

- Conduct penetration testing and vulnerability assessments on web applications and network infrastructure using industry-standard tools including Burp Suite, Metasploit, and Nmap
- Execute hands-on red teaming exercises on Hack The Box and VulnHub platforms to simulate real-world attack scenarios and privilege escalation techniques
- Collaborated with security team to develop and implement Intrusion Detection System (IDS) for monitoring network traffic and detecting malicious activity using Snort rules
- Performed manual testing to identify vulnerabilities like SQL Injection, XSS, CSRF, IDOR, Authentication & Authorization flaws
- Hands-on experience with Burp Suite, OWASP ZAP, Nmap, Nikto
- Installed and configured Nessus for vulnerability scanning on Metasploitable environments, identifying critical security misconfigurations and unpatched services
- Utilized OSINT tools including Sublistar, Maltego, and Netcraft for subdomain enumeration and digital footprinting of target domains

EDUCATION

Bachelor of Engineering in Cybersecurity

Paavai Engineering College (Paavaai Group of Institutions)

November 2021 – March 2025

Tamil Nadu, Indi

CERTIFICATIONS

Penetration Testing | CEH V13(Certified Ethical Hacking)Ec-Council | Matering Thr Art of Penetration Testing - Workshop

PROJECTS & ACHIEVEMENTS

Email-Header Analysis : Successfully detected phishing and spoofed emails using header analysis

- Identified malicious source IPs and suspicious mail servers
- Improved understanding of email authentication mechanisms (SPF/DKIM/DMARC)
- Created incident-style reports with severity and recommendations
